THE PARATECH RESCUE SUPPORT SYSTEM

The Paratech Rescue Support System is truly a “go anywhere” system. Designed to be effective for the simplest to the most demanding deployment, there isn’t a more comprehensive, scalable and straightforward system than Paratech’s. Whether you choose the precision of the AcmeThread Strut, the automatic locking collar of the LockStroke Strut or the added length of the LongShore Strut, they are strong and versatile enough for nearly every collapse and stabilization scenario.

The entire system includes 5 sizes of AcmeThread Struts, 4 sizes of LockStroke Struts, 3 sizes of HydraFusion Struts, 4 sizes of AcmeThread/LockStroke Extensions, 6 sizes of LongShore Struts, 4 LongShore Extensions and over 20 interchangeable base Plates designed to support a wide variety of contact points. All aluminum alloy components of the Rescue Support System are hard coat anodized to reduce electrical conductivity and increase strength and durability.

Truly a system that will not stop growing, Paratech’s Rescue Support System can be used in excavation collapse (trenches, mines), vehicle stabilization, structural collapse and reinforcement, or wherever there is a need for quick, strong and safe vertical or horizontal shoring.

STRUCTURAL SHORING

Earthquakes, construction collapse, cave-ins, floods and structural fire damage require a collapse rescue system designed for the purpose of extracting victims in a safe and timely manner.

VEHICLE STABILIZATION

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios.

ACMETHREAD STRUT

The Paratech **AcmeThread** Struts are comprised of a 2½" diameter Acme threaded aluminum movable solid shaft that extends out of a 3" diameter aluminum tube. The AcmeThread is a square thread that allows full surface contact of the shaft through the collar and the collar full surface contact on the tube to transfer load directly to ground. AcmeThread Struts can be extended manually or pneumatically with air, carbon dioxide or nitrogen.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut. It is as easy as... **'EXTEND & SPIN TO LOCK'**

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

LOCKSTROKE STRUT

The Paratech **LockStroke** Struts are comprised of a 2½" diameter grooved solid aluminum movable shaft that extends out of a 3" diameter aluminum tube. LockStroke Struts have a ball bearing filled collar that locks automatically when the shaft extends either manually or pneumatically with air, carbon dioxide or nitrogen.

'SET' strut into position, 'EXTEND' strut with air or manually and the strut 'LOCKS' automatically. It is as easy as... **'SET, EXTEND TO LOCK'**

HYDRAFUSION STRUT

The Paratech **HydraFusion Struts** (AcmeThread) are comprised of a 3" diameter threaded aluminum shaft that extends hydraulically out of a 3 1/2" diameter aluminum tube. The hydraulic lift capacity is 10 U.S. tons with a 2:1 safety factor. Once the strut is extended, the AcmeThread collar is spun down to the locked position and creates a 20,000 lbs. 4:1 safety factor for stabilization.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as... **'EXTEND & SPIN TO LOCK'**

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

HYDRAFUSION STRUTS

The Paratech HydraFusion Struts offer end users the ability to lift up to 10 U.S. Tons with a safety factor of 2:1 and to stabilize up to 20,000 lbs. with a safety factor of 4:1.

The innovative, built in Dual Shaft End Adapter (patent pending) allows users to safely use Paratech LongShore, LockStroke or AcmeThread Struts and Extensions in conjunction with the incredible lifting ability of the HydraFusion Strut.

MONOPOD/PULLEY KIT

The Monopod Head & Pulley attach to the 610 LongShore Strut and can be used in applications such as high angle, elevator shaft, confined space and trench rescue. The kit includes the Monopod Head & Pulley, Tri-Anchor Ring, Angle Base, Roof Plate and also includes a black ballistic nylon carrying case.

Product Features:

- Pulley assembly allows the rope to come down the outside of the tube for ease of hoisting (10,000 lb capacity)
- 1000 lb load capacity per hoist ring (4)
- Can be used with a life safety rope of up to 1/2 inch
- Monopod Head & Pulley Assembly is constructed of lightweight aluminum and stainless steel for strength and durability

Part No. 22-796575

BIPOD KIT

The Bipod Kit is designed for use in various lifting and moving applications. It can be utilized in high angle, cliff overhangs, grain elevator rescue, confined space, trench, mine and open pit rescues. The kit includes Bipod Head and two Hinged Base Plates with Anchor Rings.

Product Features:

- 60° maximum spread angle with parallel max indication lines
- High strength hinged rotating anchor Plate
- Bipod Conversion Kit is constructed of lightweight aluminum and stainless steel for strength and durability

ELEVATOR SUPPORT UNIT ADAPTER KIT

Paratech's Elevator Support Unit (ESU) safely stabilizes an elevator and prevents it from moving. When deployed, the ESU causes zero to minimal damage to elevator cars and affords rescue teams precious time to extricate passengers and save lives. Two unique rescue base and end Plates form the core components of this system. An Angled Rubber Base attaches to either Rescue Strut and grips the floor, while the Elevator Support Arm attaches to the top of the Rescue Strut and hooks under the elevator car.

TRENCH CUSHION KIT

Designed to tackle one of the biggest challenges in trench collapse rescue, this kit includes the equipment you need to quickly and safely support your shoring panels. With our proven trench cushion system you can significantly reduce the time needed to backfill your shoring panels and maintain a vertical surface for support. Included in the kit are two low pressure square cushions with a 3.3 US ton (3 m ton) capacity that can fill up to an 18 in (46 cm) void. Each cushion is fitted with o-ring harnesses for ease of lowering into the trench and a yellow centering cross to help in positioning the cushions along the sides of the trench wall. Combined with our Paratech Rescue Struts this kit will equip you with the right tools for your next trench rescue.

PARATECH VEHICLE STABILIZATION KITS

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even train locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios. They are strong, sturdy and reliable. Paratech systems are the easiest to use and the strongest VSKs on the market today.

VSK CONTROLLER

Safely use compressed air to extend struts!

This innovative controller is capable of extending the heaviest combination of struts and extensions with a simple and steady slide control.

Its low PSI/Bar range (0-16 / 0-1.1) and unique automatic vent relief feature, eliminates the fear of over pressurizing in the event of a load shift, ensuring a secure and steady strut extension. Operational input pressure range 50 - 200 psi (3.45 - 13.79 bar)

MULTIFORCE AIR LIFTING BAGS

PARATECH

MULTIFORCE

AIR LIFTING BAG

HIGHER. SAFER. FASTER. STRONGER.

Paratech's **MULTIFORCE** Air Lifting Bag takes lifting to a whole new level. Integrating the latest technology with a unique understanding of lifting, Paratech has designed the **MULTIFORCE** Air Lifting Bag to exceed expectations. Ease of use and speed of deployment make the **MULTIFORCE** Air Lifting Bag an obvious choice whether the goal is saving lives or lifting locomotives. Paratech's patent pending design ensures that the high lift of this system can get into the tightest places possible, while the innovative remote lifting base keeps personnel safely away from the load when positioning the **MULTIFORCE** Air Lifting Bag. A dual stage feature keeps the load steady as the bag inflates so load drift is minimized and safety relief valves are integrated into the bag itself making over-inflation completely impossible. No mechanical coupling between air chambers means a stronger and safer lift. The remote lifting base doubles as a storage device keeping the bag safe and making it extremely easy to store.

The **MAXIFORCE®**
AIR LIFTING BAG is a thin,
strong, molded envelope
available in 14 different sizes.

It is made from 3 layers of Neoprene covered Aramid fiber reinforcement and has the power to lift, move or shift weights up to 89 tons (80.9 metric tons) per bag. Control equipment and components play a critical role in successful lifting bag use and unlike other lifting bag systems, Paratech manufactures all of its major control components. This assures the quality of the lifting bag system from inflation to deflation.

MAXIFORCE AIR LIFTING BAGS

WHAT TO LOOK FOR WHEN SELECTING A LIFT BAG SYSTEM

- 1. SAFETY:** MAXIFORCE® Air Lifting Bags are extremely tough, made of Neoprene, embedded with three (3) full layers of Aramid fiber reinforcement on each side, giving the bags tremendous strength at full inflation. Each Air Lifting Bag has been subjected to a stringent factory pressure test to assure maximum operator safety.
- 2. CAPACITY:** Does the height/weight capacity match the task? Non-emergency applications may only require one or two sizes. Emergency Service providers need a variety of lifting capacities.
- 3. SHAPE:** Match the shape of the bag to the contact area of the load to maximize your effectiveness. Use rectangular shaped bags against linear loads and when lifting on hills or inclines. Square bags are great for stacking on flat surfaces. Rescue crews should have both square and rectangular lifting bags.
- 4. THICKNESS:** The thinner the Lift Bag the better. The most notable feature of quality manufacturing is the ability to produce a thin, tough lifting bag. MAXIFORCE Air Lifting Bags range in thickness from 3/4 in (1.9 cm) to 1 in (2.5 cm).
- 5. MATERIAL:** Neoprene with Aramid reinforcement comprise most of the lift bag materials. These materials provide strength, durability, flexibility and chemical resistance. MAXIFORCE was the first Aramid reinforced high pressure Lift Bag.
- 6. SURFACE:** Small molded raised dimples provide an interlocking surface for stacking 2 lift bags. Once again MAXIFORCE was the first with an interlocking surface.
- 7. POSITIONING EYELETS:** At least 2 on all Lift Bags with a 12.9 ton rating or higher. A must for rescue work. Allows for vertical placement, safe retrieval and carrying.
- 8. MARKINGS:** Technical data is molded into the bag surface. Warnings are permanently labeled. The famous "X" marks the center of the load.
- 9. AIR INLET:** Brass with maximum pull strength. The inlet is threaded to receive a brass inflation nipple. Why brass? No corrosion. Easy to repair.
- 10. WORKS QUIETLY:** Completely silent in use. There are no engine sounds or loud mechanical noises when MAXIFORCE is used.

Weight 63.2 lbs./ 28.7 kg

KIT CONTENTS:

- Full complement of control equipment, hoses & fittings
- 2 small rectangular bags 6 x 12 in/15.2cm x 30.5cm
- 2 larger square bags 10 x 10 in/25.4cm x 25.4cm
- 2 small square bags 6 x 6 in/15.2cm x 15.2cm
- Heavy duty rolling storage case
- 4 plastic felling wedges

DUAL AND SINGLE DEADMAN 150PSI/10.3BAR CONTROLLERS

This controller will 'go anywhere'. It is compact and extremely portable. Rescue personnel can crawl into collapse areas without hindrance. There are no protruding joysticks or cumbersome enclosures. The rocker-button design must be depressed for inflation or deflation. Large, color coded gauges make it easy to read. Relief valves and open couplings are built in the controller for maximum safety. Available in both single and dual outlets.

AIR HOSES

A full 3/8 in / 9.5 mm inside diameter in a wide range of colors and lengths. Couplings and nipples are field replaceable using simple hand tools. Working pressure of 300 psi / 20.7 bar assures reliability. Hose stays flexible over the full operating temperature range of the lift bag. Closed couplings prevent air escape at disconnect (no blowing debris).

IDEAL TOOL FOR HIGH LIFT REQUIREMENTS OF NON-REINFORCED BROAD SURFACES FOUND ON TRUCKS, VANS & LIGHT AIRCRAFT.

Rescue Air Cushions are an ideal tool for high lift requirements of non-reinforced broad surfaces found on trucks, vans and light aircraft. Cushions are also used by collapse rescue teams to fill voids and regain support for Rescue Struts, wall braces and shoring. With a maximum lift height up to 40 inches (102 cm), Rescue Air Cushions are available in 4 sizes. Paratech's Rescue Air Cushions are ready for a wide range of applications and are extremely versatile.

TRAILER LIFT

VEHICLE LIFT

Rescue Air Cushions are available in 4 sizes for maximum versatility and a wide range of applications.

Typical Applications Include:

- Major vehicle accidents (cars, trucks, buses)
- Light aircraft recovery
- Filling voids created in trench collapse
- Small vehicle turnovers
- Downed or trapped animals
- Flotation device
- Industrial lifting applications

A soft footprint allows placement on soft and uneven terrain, with a contact area exceeding lifting height.

Constructed with a highly durable contact area, Rescue Air Cushions have Neoprene coated exterior and interior reinforcement belts.

Rescue Air Cushions can be inflated using a variety of compressed air sources including industrial compressed air, compressed air storage cylinders, air brake systems and portable blowers.

VEHICLE LIFT

TRACTOR-TRAILER LIFT

CHINOOK HELICOPTER LIFT

SAFETY AND OPERATIONAL FEATURES:

- Pressure relief valves on cushions and control valve
- Interior reinforcing maintains flat lift surfaces for direction of lift force
- Quick connect couplings with locking ring
- Positioning handles
- Each cushion is factory tested at 1.3 times operating pressure
- Contact area diameter exceeds lifting height
- Operating pressure of 0-14.5 psi / 1.0 bar aramid reinforced

ADVANTAGES:

- Lifting heights from 17 in to 40 in / 43 cm to 102 cm
- Greater stability due to the size of the contact area
- Lighter loads have predictable lift results
- Full lift capacity over full lifting height
- Soft footprint allows placement on soft and uneven terrain
- User repairable for limited damage or punctures
- Four sizes to choose from

EASE OF OPERATION:

Air Cushion inflation can be made from a variety of compressed air sources:

- Industrial compressed air
- Compressed air storage cylinders
- Air brake systems
- Portable blowers

Portable, hand held controller includes adjustable valves, gauges and pressure reliefs

SHUT DOWN LIQUID LEAKS ON PIPES... TANKERS...RAILROAD TANK CARS QUICKLY, SIMPLY AND SAFELY.

EFFECTIVE SOLUTIONS TO HAZMAT PROBLEMS IN 3 EASY STEPS

1. Strap a chemical resistant reinforced neoprene bag over the leak
2. Adjust and tighten the ratchet belts and inflate
3. Apply up to 22 psi / 1.5 bar over the area to stem the flow...seal the leak and reduce contamination...FAST

LEAK SEALING BAGS

Designed for versatility, the 6 x 6 in (15.2 x 15.2 cm) size bag handles many pipe leaks. The versatile 15 x 24 in (38.1 x 61 cm) air bag is used for large pipe casings and common tanker leaks. For large gashes, tears and holes, Paratech recommends the 24 x 24 in (61 x 61 cm) inflatable sealing bag.

- Applies up to 22 psi (1.5 bar) over the damaged area to stem the flow, seal the leak, and reduce contamination...fast
- Works effectively on both smooth and rough surfaces
- Excellent for controlling leaks and punctures, in both stationary and mobile storage tanks
- Special harness design allows the bag to slide into position easily
- 16 ft (5.0 m) air hose and control valve allow emergency crews to work away from hazard zone

Shut down liquid leaks on pipes...tankers...railroad tank cars quickly, simply and safely with Paratech's easy-to-use inflatable air bag sealing system. Just strap a Paratech chemical resistant* reinforced neoprene air bag over the leak...adjust and tighten the ratchet belts and inflate.

*For specific information regarding chemical resistance of neoprene, refer to Paratech's chemical compatibility guide on our website. www.paratech.com

FORCIBLE ENTRY TOOLS

FORCIBLE ENTRY TOOLS

Paratech offers a wide range of forcible entry tools. From the compact and lightweight personal entry tools to the all-purpose Hooligan tools to the PRT Kit, Paratech has every tool you need to break through any barrier.

HOOLIGAN COMPARISONS

TiTan Crash Axe	2.5 lbs / 1.13 kg	15.7 in / 39.9 cm	1	Rescue/Police/Military

For more than 50 years Paratech has set the standard for high quality heavy-duty forcible entry tools. These tools are designed to pry, pound, puncture, twist and cut open or remove all types of barriers between emergency personnel and the life they are saving. From our popular full line of Hooligan Tools to our powerful Percussive Rescue Tool (PRT), to our compact & versatile Pry-Axe... Paratech has led the way in design and manufacturing of dependable and unstoppable forcible entry tools.

HOOLIGAN TOOL

Setting the standard of excellence for Halligan type tools, the heavy duty Paratech Hooligan tools have features such as a stress proof bar, lightweight aluminum handles with machine grooved hand grips and gently curved claws that maximize prying leverage.

Paratech also offers the SPF, a single piece forged Hooligan, a top choice by many.

PERSONAL ENTRY TOOLS

Paratech offers 3 different types of personal forcible entry tools, the Pry-Axe, Biel Tool, and the TITAN Crash Axe. The Pry-Axe has an extendable claw to offer the powerful 'Slam & Ram' capability for quick and decisive entry in tight quarters. The claw can be removed and inserted into the keyway in the axe head for twisting leverage.

PRT PERCUSSIVE RESCUE TOOL

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact, without deflection, making it safer and more effective than a sledge and wedge.

HOOLIGAN TOOL

The Hooligan Tool is one of the world's most popular forcible entry tools. These heavy-duty tools were designed to pound, puncture, pry, twist, and cut all types of barriers encountered by emergency service personnel. The head and claw are forged from high alloy steel, heat treated for maximum strength, then fitted to a 1" (2.5 cm) stress proof bar. The bar has machine grooved non-slip grips. The Hooligan Tool features a claw that is gently curved for maximum prying leverage. The claw opening is parallel and fits over locks, hasps and many door bars. It can also be used as a nail puller and a gas shut off during emergencies. The "Highway Hooligan Tool" features a metal cutting claw with a machine sharpened metal cutter that uses the can opener principle to cut heavy gauge metal and composites.

RECOMMENDED USERS:

FIRE DEPARTMENTS
LAW ENFORCEMENT AGENCIES
RESCUE SQUADS
HAZMAT TEAMS
PLANT/REFINERY MAINTENANCE CREWS
MILITARY AND PUBLIC UTILITIES

Standard Claw:

Parallel opening for gas valve shutoffs, locks and hasps.
 Machine sharpened claws.
 Recessed nail puller. Claw radius for prying leverage.

Metal Cutting Claw:

Combines the capability of prying and metal cutting. Machine sharpened metal cutter uses can opener principle to cut heavy gauge metal and composites.

PRY-AXE

Here is a tool that has withstood the test of time. For over 40 years the Pry-Axe has remained the best selling tool in our line. The Pry-Axe is being used by fire departments, police departments and rescue squads worldwide.

The Pry-Axe is a lightweight, multi-purpose, 'Slam & Ram' tool designed to pry, enlarge openings, cut sheet metal and twist off locks and latches. This efficient tool lets every firefighter force entry, rescue and ventilate without waiting for help. The Pry-Axe is small enough to carry and rugged enough for most jobs.

The Pry-Axe head and claw assemblies are separate sections forged from high alloy steel and heat treated for maximum strength. A molded rubber sleeve over the handle provides a non-slip grip. The Pry-Axe is electroless nickel plated for good looks and easy maintenance.

'SLAM AND RAM'
Action of the PRT directs all of its force directly at the point of impact

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. Primarily designed for fast, forcible entry, one person can quickly pry open locks and doors in seconds and easily break through brick and concrete block walls within a few minutes.

The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact - without deflection, making it safer and more effective than a sledge and wedge.

This heavy duty rescue tool is easily stored and transported, so it can always be...the first tool to the rescue.

PARATECH

TACTICAL FORCIBLE ENTRY TOOLS

Targeting the tactical market, Paratech has customized its forcible entry tools to cater to Police, S.W.A.T., Special Operations and Military Forces. Made with a durable black tactical finish, these high quality tools are designed to pry, pound, puncture, twist, cut open and remove all types of barriers.

HOOLIGAN TOOL

Setting the standard of excellence for Halligan type tools, the heavy duty Paratech Hooligan tools have features such as a stress proof bar, lightweight aluminum handles with machine grooved hand grips and gently curved claws that maximize prying leverage. Paratech also offers the SPF, a single piece forged Hooligan, a top choice by many.

PERSONAL ENTRY TOOLS

Paratech offers 3 different types of personal forcible entry tools, the Pry-Axe, Biel Tool, and the TITAN Crash Axe.

The Pry-Axe has an extendable claw to offer the powerful 'Slam & Ram' capability for quick and decisive entry in tight quarters. The claw can be removed and inserted into the keyway in the axe head for twisting leverage.

PRT PERCUSSIVE RESPONSE TOOL

The PRT is a powerful hand held tool that can be put to work with a minimal amount of training. The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact, without deflection, making it safer and more effective than a sledge and wedge.

TRK TACTICAL RESPONSE KIT

The Tactical Response Kit is a compact way to take every tool you need for any situation to pry, pound, twist and cut open or remove all types of barriers. This kit is also interchangeable so you can use any combination using the included lock-bars. Use a Hooligan to pry, a sledge to break concrete or a Pry-Axe to chop. Everything you need in one kit!

POWERED IMPACT TOOLS

FROM BREAKING CONCRETE, TO CUTTING THE REMAINS OF A MELTED TANKER SHELL APART, IT DELIVERS THE PUNCH.

AIRGUN

Combining ease of handling, very low air consumption, 1600-1700 high impact blows per minute and weighing only 7 lb / 3.2 kg the Airgun 40 is an ideal tool for confined rescue

PAKHAMMER

At only 11.3 lb / 5.1 kg and at 1000-1100 high impact blows per minute this PIT dramatically increases the range of rescue work for initial responding units

AIRGUN SC

It is the ideal crash rescue tool weighing 19.8 lb / 8.9 kg and exceeds current U.S. Air Force requirements for handheld pneumatic aircraft skin penetrator

Made from S7 tool steel and heat treated for long life, all PIT kits come equipped with a wide variety of standard and specialized tool bits.

**PARATECH**

POWERED IMPACT TOOLS

Paratech's Powered Impact Tools (PIT) are designed for forcible entry during fire fighting and rescue operations. They are used for cutting metal and composites, breaking masonry walls, penetrating concrete floors, forcible entry and digging during tunneling operations. Paratech's PITs consume air only on the power stroke. This unique, patented design provides a pneumatic impact and penetrating device with an adjustable power output and very low air consumption.

The combined features of light weight, very low air consumption and a wide range of power settings make Paratech's PITs extremely effective for rescue and fire fighting operations.

Rescue workers may find themselves temporarily blocked by a masonry wall or faced with the need to penetrate a concrete floor. Building collapse often requires power assisted digging for access to victims.

DISASTER RESCUE:

Earthquake, collapse.

PNEUMATIC IMPACT PENETRATOR:

Use in rescue or industry.

RESCUE/FORCIBLE ENTRY:

Break doors, locks, padlocks, hasps.

DAMAGE CONTROL:

Access to compartments through watertight doors, heavy sheet metal.

BREAKS AND PUNCHES HOLES:

Concrete, asphalt.

Conventional pneumatic, hydraulic or electric power tools always require a hook-up to a bulky remote power source.

Only Paratech PITs are designed for situations where the power source must be as portable as the tool. Designed to operate intermittently for up to 15 minutes on a single SCBA cylinder, there is nothing to stop a Paratech Powered Impact Tool from being where the action is.

The Airgun and Pakhammer are designed to operate from any compressed air source at a pressure range of 40 to 200 psi / 2.7 to 13.7 bar.

A 1000–1100 high impact blows per minute, 11 pound impact tool that dramatically increases the range of forcible entry and rescue work initial responding units can handle without calling up heavy equipment. The Pakhammer is the only pneumatic impact tool of its size that is designed to operate from portable air cylinders. It is an ideal tool for bus and train rescue, high rise work, collapse rescue or any situation that requires a powerful impact tool that operates from a limited air supply.

A 1600–1700 high impact blows per minute, 7 pound, pneumatic impact tool. Combining ease of handling, very low air consumption and high power output. It is an ideal tool for rescue work. Vehicle crash sites, metal clad buildings, aircraft penetration, exhaust ducts and composite structural material are typical barriers often faced by rescue personnel. The Airgun, using one of several specially designed tool bits, should be your tool of choice when faced by these situations. The Airgun is an ideal confined space tool.

The Airgun SC (Self Contained) is designed to exceed current U.S. Air Force requirements for an aircraft skin penetrator. It is an ideal crash rescue tool. Carrying its own limited air supply, a firefighter can rapidly insert several penetrator/applicator nozzles depending on the location and spread of fire or fuel. These penetrator/ applicator nozzles will flow water, AFFF solutions and Halon. When the self contained air supply is exhausted the air supply assembly can be quickly detached in favor of another air source. The firefighter now has the full benefit of a standard Airgun to continue rescue operations.

DAMAGE CONTROL SYSTEM (DCS)

**DIRECT
COMPRESSION**

I-Type, can be used vertically or horizontally and is the simplest and strongest as it is parallel to the load axis (see table).

CROSS-AXIAL

H-Type, can be used vertically or horizontally and takes moderate pressure (see table) as the pressure acts perpendicular to the load axis.

TRIANGULATION

K-Type, can be used vertically or horizontally and takes full pressure (see table) as the pressure acts parallel to the load axis.

The most important factor you get with Paratech's DCS is **time!** With incoming water comes increasing depth and with that, higher water pressure...one of the most unforgiving vicious cycles has begun. To break the cycle you need **time...time** to build shoring that can slow the incoming water enough for the pumps to keep up...
The Paratech Damage Control System will provide that break.

The **Paratech Damage Control System (DCS)** brings maritime damage control shoring into the 21st century. Speed, strength, flexibility and capability are the hallmarks of Paratech's DCS. Everything about the system has been engineered to simplify the difficult task Damage Control Teams have to face in the harsh and often dangerous working environments they have to perform in. With the Paratech DCS you will achieve setup speeds never seen with any wood-based system. A standard K brace can be set and fitted within one minute by an experienced team. The system is very logical and user-friendly for unexperienced crew members as well.

All components of Paratech's DCS are machined from aircraft grade aluminum for superior strength and hard-coat anodized for maximum salt-spray protection. Designed to last and perform, the DCS makes damage control shoring faster, safer and easier than ever before.

SHORING

Placing support against, beneath or above the damaged areas and preventing additional sagging, bulging and metal fatigue.

MUSAR Training Foundation Trench Rescue

- Training across America since 1991.
- Training programs range from the "newbie" through the most experienced trench rescue technicians and instructors.
- Courses designed by Ron Zawlocki (co-author of "Trench Rescue-Principles and Practice to NFPA 1006/1006 and host of the Trench Rescue Shoring" FaceBook page).
- Courses meet and exceed NFPA requirements.
- Shoring systems used are based on destructive testing results and engineer reviews.

DANGER

PERSONAL RESPONSIBILITY CODE

The member companies of FEMSA that provide emergency response equipment and services want responders to know and understand the following:

1. Firefighting and Emergency Response are inherently dangerous activities requiring proper training in their hazards and the use of extreme caution at all times.
2. It is your responsibility to read and understand any user's instructions, including purpose and limitations, provided with any piece of equipment you may be called upon to use.
3. It is your responsibility to know that you have been properly trained in Firefighting and/or Emergency Response and in the use, precautions, and care of any equipment you may be called upon to use.
4. It is your responsibility to be in proper physical condition and to maintain the personal skill level required to operate any equipment you may be called upon to use.
5. It is your responsibility to know that your equipment is in operable condition and has been maintained in accordance with the manufacturer's instructions.
6. Failure to follow these guidelines may result in death, burns or other severe injury.

ORDERING WITH CREDIT CARD USING VISA, MASTER CARD AND AMERICAN EXPRESS ONLY: We accept orders via mail, e-mail and fax. When ordering, be sure to include the item number and exact quantity of each item.

ORDERING BY PURCHASE ORDER: Orders from municipalities and fire protection districts will be re-directed to the appropriate Paratech Dealer. Terms are net 30 days with approved credit.

ORDER CONFIRMATION: Order Confirmations are sent via e-mail or fax. The confirmation is our understanding of your order requirements. Discrepancies between your order and the confirmation should be reported at once.

PRICING: All orders will ship with current pricing as indicated on your confirmation.

MINIMUM ORDER REQUIREMENT: Orders under 50.00 will assess an additional 25.00 fee for processing and handling.

FREIGHT (DOMESTIC TRUCK SHIPMENTS): F.O.B. our plant, Frankfort, IL, U.S.A. Special shipping instructions must be made at time of order. Charges will not appear on Order Confirmation.

FREIGHT (UPS or FedEx): Handling and Freight Charges will be added to invoice. Charges will not appear on order confirmation.

FREIGHT (INTERNATIONAL SHIPPING): EXW Paratech Inc. (815-469-3911) or Paratech Europe (+45-66-11-24-22). Contact Customer Service for special shipping instructions. Charges will not appear on Order Confirmation.

BACK ORDER POLICY: Due to unexpected demand, we may be temporarily out of stock on certain items. If you place an order for any merchandise that is currently not available, we will contact you regarding your order via phone or email. You will have the option of placing the order on hold or obtaining the "in-stock" items and receiving a 2nd shipment with the back-ordered items at a later date. Handling and freight will apply to the 2nd shipment.

RETURNING MERCHANDISE: Customer Service must authorize all returned merchandise in advance. Please contact the company for a Returned Goods Authorization Number (RGA#). Warranty replacements/returns for credit must go through the selling dealer. A minimum 15% restocking charge may apply.

PARATECH® RESCUE AWARD

As I am sure you are aware, our products are designed to be used in situations that often result in the saving of lives, the prevention or reduction of bodily injuries, the preservation of our environment, and the protection of property. Unfortunately, many of these incidents go unnoticed and are quickly forgotten.

Paratech would appreciate you taking a few moments to share these incidents with us by completing the Rescue Award application and mailing it to our headquarters or filling out our online application at paratech.com. We will send each active participant of your rescue our distinctive Rescue Award emblem and certificate. A separate award will be awarded in the name of the individual's unit.

The Rescue Awards we offer correspond to our main product groups:

- RSS - Rescue Support Systems
- MAXIFORCE® - Air Lifting Bags
- RAC - Rescue Air Cushions
- PIT - Powered Impact Tools
- FET - Forcible Entry Tools
- TFE - Tactical Forcible Entry
- LSS - Leak Sealing Systems

There is no limit to the amount of awards you may apply for. Paratech hopes you will apply after each and every incident involving the successful use of a Paratech product. Each award application we receive is shared with our employees and will be posted on our website for the world to see your accomplishments using Paratech equipment. The awards you receive are a tremendous source of pride for all of us here at Paratech.
